CONCEPT

THE FORM OF THE RESIDENCE IS INSPIRED BY THE JELLYFISH - A SYMBOL OF FLUIDITY, TRANSPARENCY AND ADAPTABILITY. THE FOLLOWING FLOWING STRUCTURES RESEMBLE TENTACLES THAT SUPPORT THE MAIN DOME, WHERE LIFE HAPPENS IN OPENNESS AND CONNECTION WITH NATURE.

SITE AND CONTEXT

IDEAL LOCATION

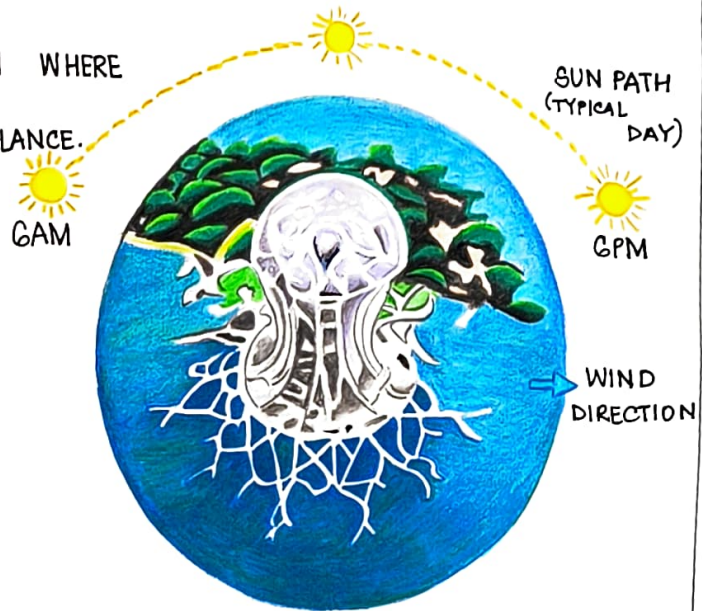

THE JELLYFISH RESIDENCE IS ENVISIONED TO BE LOCATED IN A TROPICAL COASTAL ENVIRONMENT OR WITHIN A PROTECTED LAGOON WHERE NATURE AND ARCHITECTURE COEXIST IN PERFECT BALANCE.

SUITABLE LOCATIONS

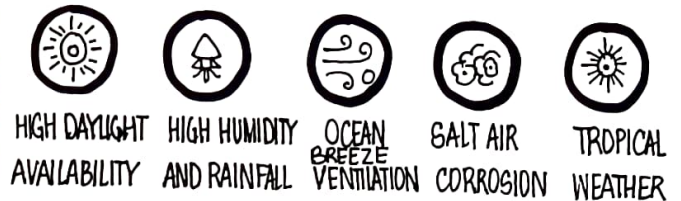

- TROPICAL ISLAND (MALDIVES, SEYCHELLES, MAURITIUS)
- PROTECTED LAGOON OR ARTIFICIAL ISLAND
- CLIFF EDGE FACING THE OCEAN
- CLAM COASTAL BAY

5 MATERIALS AND TECHNOLOGY

STRUCTURAL SYSTEM

THE STRUCTURE IS DESIGNED TO BE BOTH LIGHTWEIGHT AND STRONG, CAPABLE OF WITHSTANDING WIND LOADS AND ENSURING STABILITY FOR THE LARGE DOME.

- CENTRAL CORE - REINFORCED CONCRETE.
- PRIMARY FRAMES - STEEL/ALUMINIUM SPACE FRAME.
- SECONDARY FRAMES - CURVED STEEL RIBS.
- FOUNDATIONS - DEEP PILE/ ROCK ANCHORED

MATERIALS

• IT IS A HIGH-PERFORMANCE TRANSPARENT FLUOROPOLYMER FILM.

DOME ENVELOPE

ETFE COADION SYSTEM

(TRIPLE LAYER) HIGH LIGHT TRANSMISSION, HEAT INSULATION

SELF-CLEANING AND ANTI-DUST

POD GLASS

CURVED LOW-E LAMINATED GLASS

SMART GLASS

FLOORING

NATURAL STONE/ ENGINEERED WOOD

SUSTAINABLE AND DURABLE

STRUCTURAL FRAME

STEEL/ ALUMINIUM/ TITANIUM

ALLOY CORROSION-RESISTANT COATING

FINISHES AND INTERIOR

NATURAL, ORGANIC, CALM

COLOR PALETTE WITH INDOOR GREENERY

TECHNOLOGY AND SYSTEM

- SOLAR PANELS FOR RENEWABLE ENERGY
- RAINWATER HARVESTING SYSTEM
- SMART GLASS FOR HEAT AND LIGHT CONTROL
- NATURAL VENTILATION DESIGN
- HOME AUTOMATION SYSTEM
- WASTE MANAGEMENT SYSTEM
- BIOMIMETIC COOLING: THE TENTACLE-INSPIRED SUPPORTS USE CAPILLARY ACTION TO SUPPORT TO TRANSPORT WATER UPWARD, WHERE EVAPORATIVE COOLING NATURALLY LOWERS THE BUILDING'S SURFACE TEMPERATURE, IMPROVING THERMAL COMFORT SUSTAINABLY.

ENVIRONMENTAL STRATEGIES

- CROSS VENTILATION
- DAYLIGHT OPTIMIZATION
- SHADING WITH GREENERY
- THERMAL INSULATION
- LOW ENERGY CONSUMPTION
